

# Active Shooting Training Series

**Ed Monk, Last Resort Firearms Training**

**March 20, 2025 | Indian Hills Community College - St. John Auditorium**

## **Range Training Strategy for Aggressive Active Shooter Response & Considerations for Armed Responders to Active Shooter Attacks**

**8:00am - 12:00pm | \$40.00 | Law Enforcement Personnel - Firearms Instructors, Range Masters, Department Trainers**

This presentation will outline, explain, and show a live-fire training methodology specifically designed to build competence and confidence in armed response to quickly stop an Active Shooter. It covers the most-needed skills, the best way to train and assess those skills, and how to design and run realistic live-fire scenarios.

This presentation covers topics such as gear, mental preparation, issues armed responders should expect to encounter while fighting the Active Shooter, and the attack environment.

## **A General Study of the Active Shooter Problem & How to Minimize Victims**

**1:00-4:00pm | \$40.00 | School Administrators, Hospital Administrators, Businesses, Government Facilities**

The US has been failing at Active Shooter response for over 40 years. Because of these failures, we continue to see high victim counts in many attacks. This fast-paced, information-packed presentation includes both a detailed study of the Active Shooter threat and recommendations for how we can minimize victims in future attacks. These recommendations are for individuals and organizations and are based on historical data, math, and logic. It will cover attacks at schools, churches, businesses, government facilities, and other locations. It will cover who the attacker is, weapons he uses, usual attack start locations, and the importance of TIME & MATH in planning a response.

## **A Church-Focused Study of the Active Shooter Problem & How to Minimize Victims**

**6:00-9:00pm | \$40 | Church Security Teams**

This presentation is a focused study of the church Active Shooter attack, what responses have saved lives, and what responses have not. Topics covered include: a study of past church attacks; what is most likely to happen in church Active Shooter attack; recommendations for the church response plan; and the importance of TIME & MATH.
